

CYCLING SHOES COLLECTION
2025 2026

A professional cyclist in a red and white jersey is leading a race. He is wearing a white helmet, green-tinted sunglasses, and a red jersey with 'Intermarché' and 'TECHNORD' logos. He is riding a black road bike with 'CUBE' on the frame. Other cyclists in various colored jerseys (blue, white, black) are following him. The background is a blurred crowd of spectators.

GAERNE COMFORT FIT EXPERIENCE

Every shoe starts with the last. That's why Gaerne has developed a range of fits designed to precisely match the foot's anatomy, pedaling style and the needs of every cyclist. From our classic last, renowned for its comfort and trusted by generations of athletes, to the most high-performance racing designs, every Gaerne Fit is the result of craftsmanship, technical research and feedback from cyclists at every level. Whether you're looking for maximum power transfer, ultimate comfort, or a specific fit for off-road riding or women's needs, the Gaerne Comfort Fit Experience helps you choose the shoe that suits you best.

G.PRO FIT

Performance. Responsiveness. Precision. Designed for the most demanding cyclists, G.PRO Fit offers a snug, form-fitting shape engineered to ensure optimal power transfer and high pedal sensitivity. Built on a more tapered, racing-style last, it provides stability and control even during the most intense phases of your ride.
Recommended for: racing, high-intensity rides, cyclists seeking a precise fit.
Used on: G.Jet, G.Zephyr.

G.COMFORT FIT

Comfort. Tradition. Reliability. Built on Gaerne's classic last, renowned for its comfort, G.COMFORT Fit is the result of years of artisanal expertise. It offers a comfortable and well-structured fit, ideal for those who seek consistent support and immediate comfort, even on longer rides.
Recommended for: regular training, long distances, everyday use.
Used on: models in the collection where a specific fit is not indicated.

G.LADY FIT

A fit designed specifically for the female foot. Developed on a dedicated last, G.LADY Fit takes into account the anatomical characteristics of the female foot: narrower heel, higher arch, and a more tapered toe box offering a fit that truly reflects the shape of the female foot.
Recommended for: female cyclists looking for a truly tailored fit.
Used on: all models in the women's collection.

G.PRO FIT WIDE

Performance and comfort in a single fit. The same structure as the G.PRO Fit, but with increased volume in the forefoot area. It delivers racing-level performance even for those who need more space at the front of the foot.
Recommended for: Cyclists seeking high performance with greater freedom in the forefoot.
Used on: G.Jet Wide.

G.COMFORT FIT WIDE

More room, same DNA. The Wide version of the G.COMFORT Fit increases volume in the forefoot area, offering a roomier fit without compromising Gaerne's signature stability.
Recommended for: wide feet, cyclists seeking maximum comfort.
Used on: G.Fuga Wide, G.Sprint+ Wide, G.Trail+ Wide.

G.ALL TERRAIN FIT

Stability. Protection. Control. G.ALL TERRAIN Fit was developed for off-road use, including trails and mixed terrain. It offers a supportive and secure fit, designed to ensure comfort, grip, and safety—even during walking or hike-a-bike sections.
Recommended for: MTB, E-MTB, off-road adventures.
Used on: the entire G.All Mountain collection.

Road Soles

GAERNE EPS LIGHTWEIGHT FULL CARBON SOLE 12.0

This ultra-light and ultra-thin sole, made with an optimized carbon fiber weave, ensures every watt of power is transferred to the pedals. Foot stability is increased thanks to the shape of the sole in the plantar arch area. Four air vents guarantee ventilation inside the shoe. The sole features an anti-slip insert in the toe and an interchangeable pad in the rear. Cleat position options allow for a personalized adjustment. An alignment scale printed on the sole allows you to memorize the position of the cleat. The stiffness index is outstanding, rated at 12.

◀◀ Anti slip insert in the toe

◀◀ Four air vents guarantee ventilation inside the shoe

Interchangeable pad in the rear ▶▶

**GAERNE EPS LIGHT
WEIGHT FULL
CARBON SOLE 10.0**

The full carbon sole "GAERNE EPS LIGHTWEIGHT FULL CARBON SOLE 10.0" guarantees absolute lightness and rigidity. The ultra-thin carbon thickness allows the foot to be positioned at a minimal distance from the pedal, ensuring maximum power transfer while pedaling without energy loss. Two channels positioned in the sole ensure perfect ventilation for the foot during use. Non-slip TPU inserts in the front and back of the sole provide security while walking, the rear insert is replaceable. The sole is compatible with all clipless pedals. The stiffness index is of 10

**GAERNE EPS CARBON
POWER SOLE 8.0**

THE GAERNE EPS CARBON POWER SOLE 8.0 is made of nylon enriched with carbon to provide optimum rigidity. The thin thickness ensures smooth pedaling without energy dispersion. Foot stability is increased thanks to the shape of the sole in the plantar arch area. Five air vents guarantee ventilation inside the shoe. The sole features an anti-slip insert in the toe and an interchangeable pad in the rear. An alignment scale printed on the sole allows you to memorize the position of the cleat. Cleat position options allow for a personalized adjustment. Compatible with most available quick-release pedals. The stiffness index is of 8.

The INFIT CLOSURE SYSTEM 1.0
features differentiated zone adjustments with an asymmetrical design, ensuring enhanced stability during pedaling and minimizing pressure points. This ensures a precise fit, exceptional comfort, and optimized power transfer.

The micro-adjustable **BOA Li2 DIAL F** platform delivers quick, effortless, and precise fit adjustments. It offers exceptional durability, with a sleek, low-profile design, while the rubberized finish ensures superior grip and control.

THE BOA GUARANTEE
Boa Technology guarantees the reels and the cables of the BOA fit system for the entire useful life of the product

TARSAL SUPPORT SYSTEM
To ensure the perfect position of the foot inside the shoe, obtaining a rounded and more efficient pedal stroke.

INTEGRATED ANTI SLIP HEEL CUP
The integrated anti slip heel-cup allows for the best foot stability and power transmission. Internal non-slip treatment secures optimal foot positioning.

COMFORT FIT TONGUE 1.0
Utilizing a variable thickness on its longitudinal and transverse section, obtained thanks to the seamless construction technique. Internally it is built with a high-tech cushion layer and is perforated for optimal breathability.

AIR VENTILATION SYSTEM
The shoe provides excellent breathability and aides in sweat evaporation to grant a perfect climate

G.Jet Elevate your ride

The **G.Jet** is Gaerne's ultimate innovation in cycling footwear, combining lightweight design with exceptional responsiveness for maximum power transfer and a seamless connection to your bike. Engineered for superior control and comfort, it boosts efficiency, empowering you to push beyond your limits.

Michelin® Soles

POWERED BY MICHELIN® TECHNICAL SOLES

GAERNE EPS LIGHT WEIGHT CARBON FIBER MTB SOLE 10.0

Gaerne technology combined with the know-how of Michelin's designers and technicians, gave birth to the EPS Light Weight Carbon Fiber Mtb sole 10.0, offering the right mix of performance, durability, strength and lightweight. Its structure is made up of carbon to provide excellent stiffness and power in pedaling. Michelin rubber tread combines a compound designed to balance performance and abrasion resistance also in extreme conditions – with a design profile which allows for excellent hold and traction. The large distance between the treads allows better self-cleaning and instant mud shedding. For the riders who need even more grip, two holes in the toe cup allow the fixing of screw-on and interchangeable cleats. Tested by the best bikers, this sole represents the pinnacle in terms of technology, innovation and functional quality.

Mtb Soles

GAERNE MTB 2DENSITY SOLE 7.0

Direct from the Research and Development Team at Gaerne comes the "MTB 2DENSITY SOLE 7.0". A new sole designed specifically for Mountain Bike use. The structure of the sole combines both nylon and fiberglass materials, making it durable, lightweight and thin. The tread has been designed to ensure maximum grip/stability and has an excellent resistance to varying types of terrain. Two removable front studs give this shoe improved traction in variable and muddy terrains.

The IN FIT CLOSURE SYSTEM 1.0
features differentiated zone adjustments with an asymmetrical design, ensuring enhanced stability during pedaling and minimizing pressure points. This ensures a precise fit, exceptional comfort, and optimized power transfer.

BOA Li2 Dial F

The micro-adjustable **BOA Li2 DIAL F** platform delivers quick, effortless, and precise fit adjustments. It offers exceptional durability, with a sleek, low-profile design, while the rubberized finish ensures superior grip and control.

THE BOA GUARANTEE
Boa Technology guarantees the reels and the cables of the BOA fit system for the entire useful life of the product

TARSAL SUPPORT SYSTEM

To ensure the perfect position of the foot inside the shoe, obtaining a rounded and more efficient pedal stroke.

INTEGRATED ANTI SLIP HEEL CUP

The integrated anti slip heel-cup allows for the best foot stability and power transmission. Internal non-slip treatment secures optimal foot positioning.

COMFORT FIT TONGUE 1.0

Utilizing a variable thickness on its longitudinal and transverse section, obtained thanks to the seamless construction technique. Internally it is built with a high-tech cushion layer and is perforated for optimal breathability.

AIR VENTILATION SYSTEM

The shoe provides excellent breathability and aides in sweat evaporation to grant a perfect climate

ANTI-ABRASION reinforcement on the points of greatest contact of the upper.

G.Rock

The **G.ROCK** is the Gaerne's ultimate innovation in mountain biking shoe, combining lightweight design with exceptional responsiveness for maximum power transfer and a seamless connection to your bike. Engineered for superior control and all-day comfort, it excels on the toughest trails, pushing your performance to the next level.

Carbon G.Dare

The precision of every detail, designed for the off-the-radar performance.

Meticulous research into refined materials and brand new technological solutions makes for incredible performance.

DUAL FITTING CLOSURE SYSTEM

Two independent BOA Dial Z allow to obtain a precise, fast and personalized closure without any pressure point

SPEED, PRECISION, PERFORMANCE, MOTION.

Premium aerodynamic dial design to integrate with cycling shoes for uncompromised performance and to deliver precision fit, directional grips optimized and combined with the rubberized finish, makes it more effective grip.

THE BOA GUARANTEE

Boa Technology guarantees the reels and the cables of the BOA fit system for the entire useful life of the product
